

US Bioservices has Genentech's XOLAIR[®] in stock. Fax your prescriptions to (866) 223-7485.

US Bioservices has been selected as an authorized specialty pharmacy in a limited distribution network for XOLAIR[®] (omalizumab). Xolair is an anti-IgE antibody subcutaneous injection medication with two therapeutic indications.

Indications

- **Moderate to severe persistent asthma** in patients over age 12 years with a positive skin test or *in vitro* reactivity to a perennial aeroallergen and symptoms that are inadequately controlled with inhaled corticosteroids
- **Chronic idiopathic urticaria** (CIU) in adults and adolescents (12 years of age and above) who remain symptomatic despite H1 antihistamine treatment

At a Glance

- Dosing for asthma: Xolair 150 to 375 mg SC every 2 or 4 weeks. Determine dose (mg) and dosing frequency by serum total IgE level (IU/mL), measured before the start of treatment, and body weight. See full prescribing information for dosing chart.
- Dosing for CIU: Xolair 150 or 300 mg SC every 4 weeks. Dosing in CIU is not dependent on serum IgE level or body weight.
- Formulation: Lyophilized, sterile powder in a single-use 5mL vial, 150 mg
- NDC: 50242-040-62
- Packaging: 1 vial, single-use in 1 carton
